Equity Fund Aim

The Company will invest in equities on a global basis.

The Company's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The Company has stringent investment criteria which the ACD, as investment manager, adheres to in selecting securities for the Company's investment portfolio. These criteria aim to ensure that the Company invests in:

- high quality businesses that can sustain a high return on operating capital employed;
- businesses whose advantages are difficult to replicate;
- businesses which do not require significant leverage to generate returns;
- businesses with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- businesses that are resilient to change, particularly technological innovation;
- businesses whose valuation is considered by the Company to be attractive.

Investors should be aware that the application of these investment criteria significantly limits the number of potential investments for the Company's portfolio. It is envisaged that the investment portfolio of the Company will be concentrated, generally comprising between 20 and 30 stocks.

The Company will not invest in derivatives and will not hedge any currency exposure arising from within the operations of an investee business nor from the holding of an investment denominated in a currency other than sterling.

Portfolio Comment for June 2013

During the month we rationalised our holdings by selling our stakes in Sigma-Aldrich and Schindler Holdings. Schindler had become one of our smallest holdings as its valuation prevented us from adding to it, and we retain an investment in the elevator and escalator sector with our holding in Kone. Although we like the Sigma-Aldrich business we were concerned by the recent disclosure that Sigma had bid, albeit unsuccessfully, for Life Technologies, a company which is much larger than itself in terms of both market capitalisation and revenues.

Our low portfolio turnover means that we in effect leave the reinvestment of the high cash returns on capital which our portfolio companies generate to the management which is why we worry when they engage in large, unexplained and potentially value destructive projects, including acquisitions. During the month we started accumulating a stake in a European IT services company.

The top 5 contributors in the month were Swedish Match, Waters, McDonald's, Pepsico and Johnson & Johnson. The top 5 detractors in the month were Kone, Stryker, Intercontinental Hotels, Imperial Tobacco and Unilever.

Top 10 Holdings

- Domino's Pizza
- Stryker
- Dr Pepper Snapple
- Microsoft
- Reckitt Benckiser Group
- Imperial Tobacco
- Becton Dickinson

Just a small number of high quality, resilient, global growth companies that are good value and which we intend to hold for a long time, and in which we invest our own money.

* The OCF (Ongoing Charges Figure) is the total expenses paid by the fund (excluding bank overdraft interest), annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change. The OCF is for the year ended 31 December 2012.

[^] The PTR (Portfolio Turnover Ratio) has been calculated in accordance with the methodology laid down by the FSA. This compares the total share purchases and sales less total creations and liquidations with the average net asset value of the fund.
