Investment objective of the SICAV

The Fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The investment objective of the Sub-fund is to achieve long-term growth in value. The Sub-fund will invest in equities on a global basis. The Sub-fund's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The Sub-fund has stringent investment criteria which the Investment Manager adheres to in selecting securities for the Sub-fund's investment portfolio. These criteria aim to ensure that the Sub-fund invests in:

- ▶ high quality businesses that can sustain a high return on operating capital employed;
- ▶ businesses whose advantages are difficult to replicate;
- ▶ businesses which do not require significant leverage to generate returns;
- ▶ businesses with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- ▶ businesses that are resilient to change, particularly technological innovation; and/or
- ▶ businesses whose valuation is considered by the Investment Manager to be attractive.

It is envisaged that the investment portfolio of the Sub-fund will be concentrated, generally comprising between 20 and 30 stocks.

The Sub-fund takes sustainability risk and ESG characteristics into account as part of its selection process. In that respect, the Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. For the assessment, areas like corporate strategy, corporate governance, transparency and the product and service range of a company are taken into account. More information can be found in the Prospectus.

Principal Risks

- ▶ **Currency Risk:** The fund's portfolio is a global portfolio and many of the investments are not denominated in Euros. There is no currency hedging made by the fund. The Euro price of the shares may therefore rise or fall purely on account of exchange rate movements.
- ▶ **Concentration Risk:** The fund's portfolio complies with the UCITS requirements on spread of investment. Having said that, application of the investment criteria described above significantly limits the number of potential investments: the fund generally invests in 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock has a greater effect on the price of the fund.
- ▶ **Operational Risk:** Failures or delays in operational processes may negatively affect the fund.
- ▶ **Sustainability risk:** The Fund is subject to the risk that environmental, social or governance conditions or events may occur that may have a material negative impact on the value of its investments.
- ▶ **Risks inherent in the holding of shares:** There is no assurance that any appreciation in the value of investments in Shares will occur. The Net Asset Value per Share is expected to fluctuate over time with the performance of the Sub-fund's investments. A Shareholder may not fully recover his initial investment when he chooses to redeem his Shares or upon compulsory redemption, if the Net Asset Value per Share at the time of such redemption is less than the Subscription Price paid by such Shareholder or if there remain any unamortised costs and expenses of establishing the Sub-fund. An investment in Shares should only be made by those persons who are able to sustain a loss on their investment. The Shares should be viewed as long term investments (at least 5 years).

Just a small number of high quality, resilient, global growth companies that are good value and which we intend to hold for a long time, and in which we invest our own money.

" Active Share measures how much the portfolio holdings differ from the benchmark index (MSCI World) i.e. a portfolio that is identical to the benchmark would have 0% active share.

* The OCF (Ongoing Charges Figure) is the total expenses paid by the fund (excluding bank overdraft interest), annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change. The OCF is updated following the publication of accounts for the periods ending 30th June and 31st December. The fees and charges paid by the Fund will reduce the return on your investment. Certain costs paid by the und will be charged in Euros and exchange rate fluctuations may cause these costs to increase or decrease when converted into your local currency.

The PTR (Portfolio Turnover Ratio) has been calculated in accordance with the methodology laid down by the CSSF. This compares the total share purchases and sales less total creations and liquidations with the average net asset value of the fund. > 7 Day Fund Liquidity is calculated based upon 30% of trailing 20 day average volume.

< Gross Yield reflects the historic dividend income received by the fund in the preceding 12 months before the deduction of all expenses including management fees. Net yield is Gross Yield less the deduction of all expenses including management fees i.e. Gross Yield less the OCF. In both cases we use T Class Shares as reference. Please note that rates would vary for I Class and R Class shares. Additional fund expenses will further reduce the yield received.
