

◊ Active Share measures how much the portfolio holdings differ from the comparator benchmark (MSCI World) i.e. a portfolio that is identical to the benchmark would have 0% active share. Source: Factset.

* The OCF (Ongoing Charges Figure) is the total expenses paid by the fund (excluding bank overdraft interest), annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change. The OCF is updated following the publication of accounts for the periods ending 30th June and 31st December.

△ The PTR (Portfolio Turnover Rate) is a measure of the fund's trading activity, and has been calculated by taking the total share purchases and sales less total creations and liquidations divided by the average net asset value of the fund.

7 Day Fund Liquidity is calculated based upon 30% of trailing 20 day average volume.

§ Gross Yield reflects the historic dividend income received by the fund in the preceding 12 months before the deduction of all expenses including management fees. Net Yield is Gross Yield less the deduction of all expenses including management fees i.e. Gross Yield less the OCF. In both cases we use the I Class Shares as reference. Please note that rates would vary for T Class shares.

N.B. When a position is being built for the fund the company name is not disclosed in factsheet data.

Disclaimer: A Key Investor Information Document and an English language prospectus for the Fundsmith Stewardship Fund are available via the [Fundsmith website](https://www.fundsmith.co.uk/fsef/documents) (www.fundsmith.co.uk/fsef/documents) or on request and investors should consult these documents before purchasing shares in the fund. Past performance is not necessarily a guide to future performance. The value of investments and the income from them may fall as well as rise and be affected by changes in exchange rates, and you may not get back the amount of your original investment.
